

LAB30

Submission

In 2009, 8th LAB30 of Augsburg (Nov 5th-7th) invites artists and creatives to a media art festival in Augsburg.

LAB30 wants to be a platform for experimental art projects which inherit an artistic reflexion – via digital or analog technologies – on our modified world, and communicate new perceptions by interactivity or digital sounds and images. The young festival is addressed to artists from European (Media) Art colleges and universities respectively their environment as well as the local scene. It is a showcase for sound-experiments and also a place for communication between artists and audience.

The festival covers 400 m² of space for the exhibition, a BlackBoxStage for sound- and image-experiments and a club.

The organisational team is looking forward to receive the following:

- 1) For the exhibition: interactive installations and projects that play with current (computer-) technologies and digital possibilities and ways in a visual or acoustic way. The works shouldn't be older than three years. To maintain the atmosphere of working and communicating it is necessary that the artists present their pieces in Augsburg during the festival. The organisational team will take care of board and lodging. There will be a catalogue with a short introduction on each artist and his/her work.
- 2) For the BlackBoxStage: audiovisual projects that deal with the special situation of the place. The audience is located at a u-formed stage in the theatre, any projections (3 x approx. 4 x 4 m, front, left and right) are possible.

A panel will choose a selection of all applications. A prize will be awarded amounting to 1.000 EUR among all projects that take part in the exhibition.

Tender ends with **July 31st, 2009**. You can send significant documentations on DVD, CD-Rom or websites to

Kulturamt der Stadt Augsburg
